C.B. 1/22/02
January 16, 2002

Dear Sir:

In response to the Office Action dated October 16, 2001, please amend the above identified application as follows:

IN THE SPECIFICATION:

Please replace the paragraph beginning at page 7, line 23, with the following rewritten paragraph:

SUB
C7
B1
A glass transition point of the copolymer is preferably at or below 50°C and further preferably ranges from -30 through 50°C. A softening point of the copolymer according to a flow tester is preferably at or below room temperature and further preferably ranges from 40 through 150°C. The reason why the above glass transition point and softening point are preferable is that
